

CORONAVIRUS (COVID-19) and You

TO OUR PATIENTS

As concern grows over the COVID-19 pandemic, we want you to know that the health of our team and you, our patients is always our primary concern.

We want you to know that we have a well coordinated infection prevention program, dedicated to preventing transmission of any disease within our practice. We incorporate the most current recommendations from Centers for Disease Control & Prevention (CDC) into everything we do.

For your safety and ours, we ALWAYS:

- Use EPA hospital grade disinfectants for comprehensive surface disinfection between all patient encounters
 - Perform thorough hand hygiene at every appropriate opportunity to prevent the spread of disease
 - Follow all CDC guidelines for disinfection and sterilization of instruments and devices
 - Regularly confirm the effectiveness of our sterilizer(s) by laboratory testing
- We look forward to seeing you at your next scheduled appointment. We want you to be confident we are doing everything possible to ensure we deliver the care you need to support your healthcare needs.
